NOTICE OF BRIDGE CONSTRUCTION

Katherine Street Bridge Over Trans Canada Trail Township of Woolwich

The Regional Municipality of Waterloo will undertake the rehabilitation of the Katherine Street Bridge at the TransCanada Trail in the summer of 2011 (see keymap).

Traffic will be maintained on Katherine Street and across the structure by staging the rehabilitation half the width of the structure at a time using portable traffic control signals at either end of the bridge to alternate traffic flow.

We are advising that this project is expected to begin approximately May 2, 2011 and is estimated to take approximately 4 months to complete.

Thank you in advance for your patience and cooperation.

Should you have any questions on this project, please contact Ken Brisbois, Project Manager Region of Waterloo Tel: 519-575-4606 or email: kbrisbois@regionofwaterloo.ca
